Reducing Costs, Saving Time, Providing Insights & Student Satisfaction

Active-Class ([link](#)) supercharges online learning and teaching, whilst reducing the load on admin and IT staff. Active-Class' **Learning Management System** (LMS, [link](#)) accelerates learning, with topic level insights into individual performance. It supports institutions in ensuring the best student experience.

Reducing costs – Removes the need to maintain local infrastructure, costly updates and dedicated IT teams, whilst scaling on demand.

Saving time – Saves time and errors by creating reciprocal communication tunnels between multiple isolated systems, which are currently used to juggle disparate tasks (e.g. student records and learning management systems).

Providing insights – Provide insights for educators and support teams enabling them to provide personalised student guidance, via customised dashboard, intuitive plots and flags.

Student satisfaction – Developed by an award-winning lecturer with years of experience working with a diverse range of students in different countries, universities and disciplines.

Cloud Based SaaS

	Competitors*	Active-Class
Operation	Many platforms provide numerous confusing options, complicating system operability.	With dashboards for educators and drag-and-drop usability for administrators, Active-Class is user-friendly and easy to operate.
Technology	Current platforms use legacy technology with slow and frustrating systems.	Using state-of-the-art technology, Active-Class is fast with virtually no waiting time so users can focus on their tasks.
Maintenance cost	Current platforms require costly infrastructure and in-house expertise to operate.	Active-Class is a cloud-based Software as a Service (SaaS). So no more dedicated IT teams and costly maintenance or updates.
Scalability and remote access	Current systems rely on access to local infrastructure, providing a poor remote service.	Using cloud, Active-Class offers the same service regardless of user-location, enabling consistent remote teaching and access.
Cost	Most current platforms do not have an open pricing policy.	Active-Class has a transparent pricing policy with two subscription options for teachers (standard and premium) and licensing for institutions.

* based on the most commonly used platforms such as Moodle, Blackboard and Canvas.

Easy Automation and Integration

Automated Performance reports for quality and external reviews creates administrative efficiencies, so that staff can focus more on supporting students.

Active-Class provides facilities for quick and easy migration/integration giving you the flexibility to replace or integrate with, current learning management systems.

Integration into your existing infrastructure is seamless, with the cutting-edge tools we have developed to reduce time and labour costs.

You maintain functionality of your current learning management system and more.

Active-Class is fully managed for you on the cloud with easy integrations for external platforms such as plagiarism checks, relieving IT teams of the burden on support.

World Class Online Learning

Simple structure	Active-Class follows a simple and yet efficient model of class-module-activity, enabling easy navigation at each level.
Organisation and event planner	All activities and events are clearly shown in the calendar, offering a quick and concise overview of the tasks and schedule.
Content management	Activities are for everything; from announcements, simple file sharing and small formative assignments, to large summative assessments.
Sharing and collaboration	Teachers can collaborate and share on Classes, Modules, and Activities. They can mark together and share accounts to give full access to colleagues.
Progress tracking	Teachers can monitor students' engagement and progress through clear plots and tables. Summary data encapsulates modules and classes. Students can also see their performance across all their modules and activities.
Custom grading systems	Multiple predefined grading systems are already set up in the system. But custom grading systems can also be created to meet every need.
Auto-grading	Auto-grading immediately feeds back on students' performance in activities.
Anonymous messaging	Messaging functionality facilitates communication between individuals and groups. Optional anonymity encourages questions and dialogue.
Responsive design	The responsive design enables users to access the system via their smartphone with ease and comfort.
Timed and untimed activities	Assignments, quizzes and exams can be scheduled to be time-limited, self-paced or synchronous, suiting different needs.
Import and export data	Data can be imported and exported, using common file formats and protocols.
